Good...

Important to the Trade

This price supplement "G" is a handy reference illustrating our many important and new items and supersedes all previous lists.

The using of "Good" Goods EXCLUSIVELY closes one of the greatest "leaks" in the Plumbing business, eliminating come-backs and time loss "overhead" and otherwise.

As a rule that loss from the uncertainty of the time cost is not caused by the journeyman, but by the goods he uses, a fact overlooked by many of the Trade.

This loss we prevent through the perfection of our goods and our THREE INSPECTIONS, safeguarding each and every piece, a fact attested by the very many of the Trade who have used "Good" Goods exclusively for the many, many years.

Most of "Good" Goods are packed in Standard Packages, full, half and quarters, being of the amounts our experience has proven usually required by the Trade.

Orders shipped same day as received.

Mail orders receiving same prompt attention.

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE

Why "GOOD" Rubber Goods

Every article of rubber is used either for a different purpose or is of different size or shape.

Hence, no two can be alike if they are to produce the very best results in the use for which they are intended.

They must differ either in compound, kind of rubber—manner of curing or other process of manufacture.

Specializing for the past 28 years as we have in this (done by no other company), we have developed the very best for each individual article, which is the reason for "GOOD" Goods giving better results than any other and being acknowledged "Standard of the World."

The reason why no one else has ever been able to duplicate "GOOD" Goods is that so much depends upon our special cures and other processes of manufacture (some of which are patented) and known only to us.

"GOOD"
Velvet Seat
TANK BULBS

Construction Patented, March 23, 1920

The "Good" Velvet Seat Bulb will meet all proper requirements under any and all conditions.

It will make tight when all others fail, even if valve seat is slightly imperfect.

It will avoid "comebacks" and time loss.

The NEW feature of the "Velvet Seat" is a special cure of a particularly fine quality of rubber developed for this especial purpose, and is duplicated by none.

The "Good" Velvet Seat Bulb has NO SEAM between top and bottom, but is ALL ONE, impossible to come apart—reinforced top of the same fine resilient quality, hence cannot elongate, and is as perfect a Bulb as it is possible to manufacture.

The "GOOD" Window Display Card

"Good" Velvet Seat Bulb

"Good" Air Cell Float

"Good" Velvet Seat Tank Bulbs

Perfect results in use, patented March 23, 1920

Illustration packed in carton

Each and every bulb perfect
No seam in center
All one piece
Reinforced top
Cannot come apart
or elongate

Standard Package, 1 Gross

There is never any time loss in using "Good" "Velvet Seat" Tank Bulbs, which make them by far the *cheapest* to use, and for this we hold ourselves responsible.

It is of utmost importance that the *proper size bulb is used,* we therefore manufacture seven sizes, one to fit every size valve made and each size in use, making complete assortments of great advantage, as frequently the trade have the expense of repeated trip caused solely by incorrect size bulb having been installed.

The Care of Bulbs

Each "Good" Bulb is mounted (screwed fast) in a carton. It is absolutely necessary that they remain packed in this manner until used, in order that the sensitive "velvet seat" bottom retain its perfect shape.

See window display card we furnish on opposite page.

"Good" New Adjustable Fuller Balls

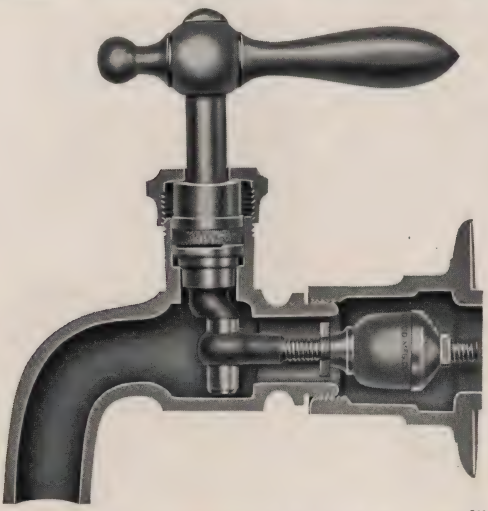
Timber-grain Construction

PERFECT FULLER WORK SERVICE and repairing is made absolutely certain by using "Good" Timber grain Adjustable Fuller Balls properly adjusted —Bronze Stem and Eccentric, specially fitted.

The Timber grain, layer upon layer, of the "Good" Adjustable Fuller Ball is the result of thirty years of research and manufacturing; producing the only ball that positively cannot swell and will stand any degree of hot or cold water.

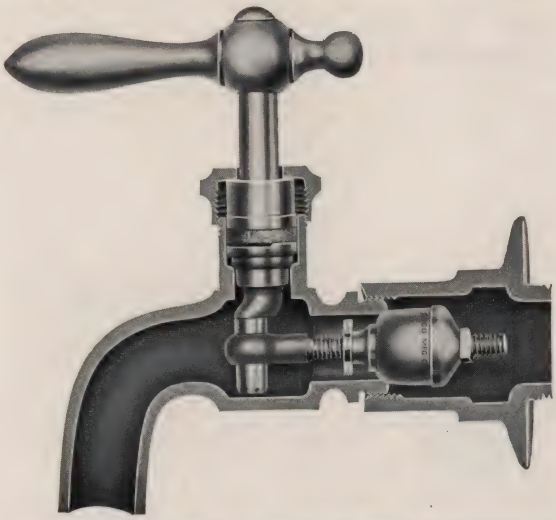
Certain Satisfaction to your customer—
Certain Profits to yourself—
No Time Loss . . No "Come-backs"

"Good" Fuller Ball—Faucet Open



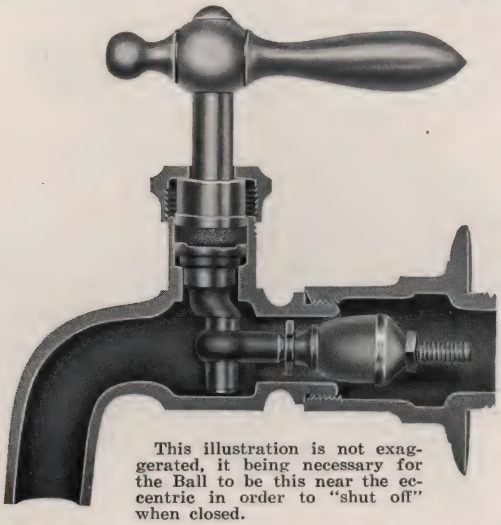
Faucet open, showing how the waterway in using the "Good" Fuller Balls is opened to the fullest.

"Good" Fuller Ball—Faucet Closed



Faucet closed, showing how the entire strength is utilized in the "Good" Fuller Balls, making perfect cushion seat on the end—non-hammering.

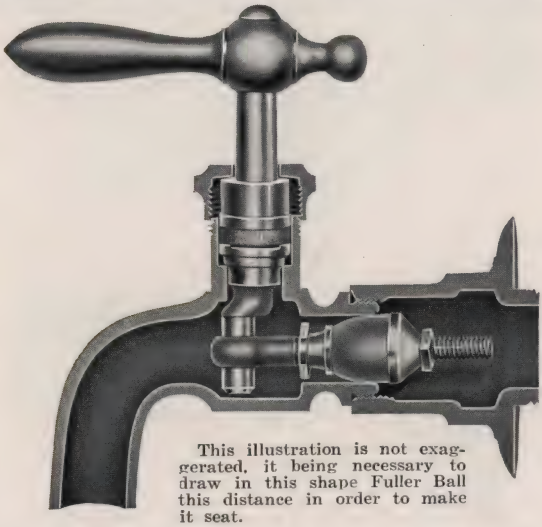
Other Fuller Ball—Faucet Open



This illustration is not exaggerated, it being necessary for the Ball to be this near the eccentric in order to "shut off" when closed.

Faucet open, showing extremely small waterway in using all Fuller Balls excepting the "Good."

Other Fuller Ball—Faucet Closed



This illustration is not exaggerated, it being necessary to draw in this shape Fuller Ball this distance in order to make it seat.

Faucet closed, showing how almost the entire strength of all Fuller Balls, excepting the "Good," is lost, seating on the side and pressing Ball out of shape.

"Good" New Adjustable Fuller Balls

For any Temperature from Freezing Point to Steam

Plumbers' Friends—Extra Quality

Nos. 0 and 1

	No. 0	No. 1
Diameter of cup . . .	4½ inches	4 inches
Length of cup	4¾ inches	5 inches
Length of cup and handle	27 inches	27 inches

Code		Each
Ipo	No. 0, complete	$4.24
Iranic	No. 0, with clamp, less handle	4.10
Cleave	No. 1, complete	3.58
Encage	No. 1, with clamp, less handle	3.48

These styles are of a good heavy construction of a quality specially developed to stand up under the hard usage given them by the trade. They are the *best* Plumbers' Friends made.

G 155

G 156

No. 3

Diameter of cup	4 inches
Length of cup	4¼ inches
Length of cup and handle .	27 inches

Code		Each
Epic	No. 3, complete	$1.26
Era	No. 3, with clamp, less handle	1.16

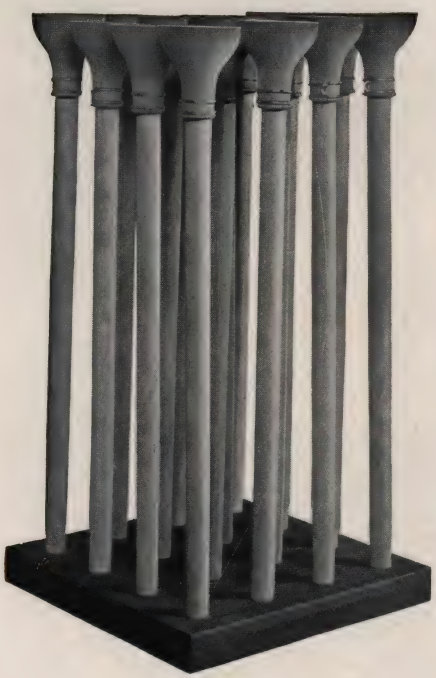
This style is specially designed for sale by the trade, in place of loaning their own or forcing their customers to go elsewhere for them. The construction is somewhat lighter than Nos. 0 and 1, and of different quality, but good.

It is very satisfactory and much better than the cheap Plumbers' Friends usually sold, so as not to react and interfere with other business, which is liable to be the case when the quality is too poor.

Standard Package, 4 Dozen

Plumbers' Friends and Force Cups
Extra Quality

Display Board



G 157

We have made this stand to meet the requirements of our customers who find it far more profitable to sell Plumbers' Friends to their patrons than to loan them their own or let them buy at department or other stores, thus fostering competition.

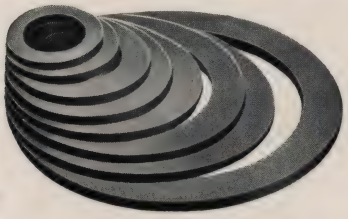
"Good" Union Washers

A Size to Fit Every Union



G 173

"Good" Red Rubber Union Washers for all-around use are made of a compound based on that of our famous "Good" Red Steam Packing and, like it, will stand Water, Gas, Air and, in fact, anything up to Superheated Steam.

"Good" Black Rubber Union Washers for use on Water, Gas and Air, but "Not for Steam."

"Good" Fiber Union Washers are of stock specially treated to remove all traces of acid and are accordingly the most reliable fiber washers to be had.

"Good" Tested Fittings

Each Fitting Tested under Pressure—Each Fitting Perfect

The "Good" Tested Fittings

avoid all possible time loss for which the Good Manufacturing Company hold themselves responsible.

The basis for manufacturing such fittings is that the money loss in time—holding up of contracts and otherwise—from imperfect fittings is so out of proportion to the small cost of the fitting. Therefore fittings which could be depended upon under all conditions would be by far the most profitable to use for all classes of work from the finest to the cheapest.

How the "Good" Tested Fittings are Manufactured

Test—Each and every fitting is individually tested under high pressure.
Weight—Heavy solid brass.
Beads—Very heavy to prevent splitting.
Threads—Perfect full threads.
Recessed—Every fitting is recessed to conceal connecting threads.
Finish—An extra hard nickel with very high polish.
Our Responsibility—We will be responsible for any time loss where the fitting should be at fault.

Summary—Fittings such as have never yet been made by anyone—prices right.

Each "Good" Tested Fitting has the full company name and "Tested" stamped thereon.

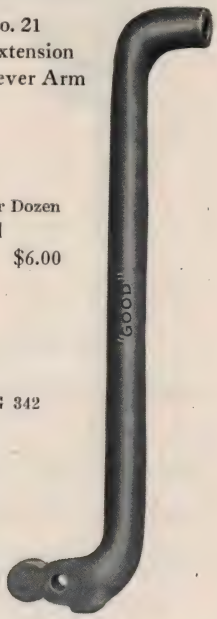
Never	No. 21. Extension Lever Arm to fit No. 21 Ball Cock	$6.00

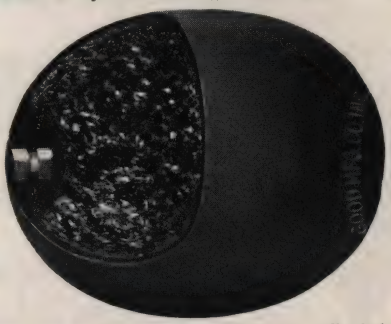
G 342



"Good" Air Cell Float

Hard Rubber — Stands Any Water — Cannot Sink

Cut away to show interior construction of separately sealed Air Cells



G 343

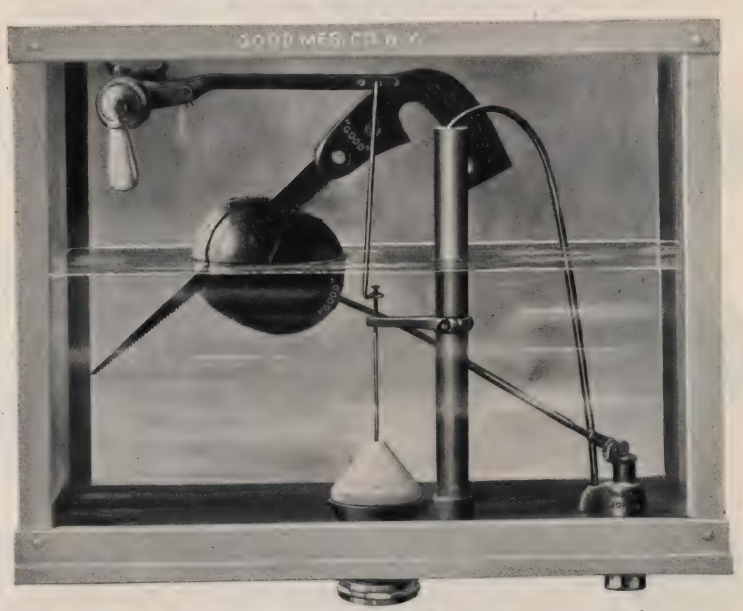
Having more buoyancy than any other float, will shut off tight at any pressure where others fail or make trouble. *Will Shut Off Tight* even if accidentally *cracked* or *broken,* as the interior is made up of thousands of separately sealed air cells which keep it from filling with water.

"Good" Air Cell Hard Rubber Floats will stand any kind of water, not being affected by Acid, Alkali or any other impurity in water.

¼ x 20 Thread Squared and Grooved Brass Spud "BUILT-IN."

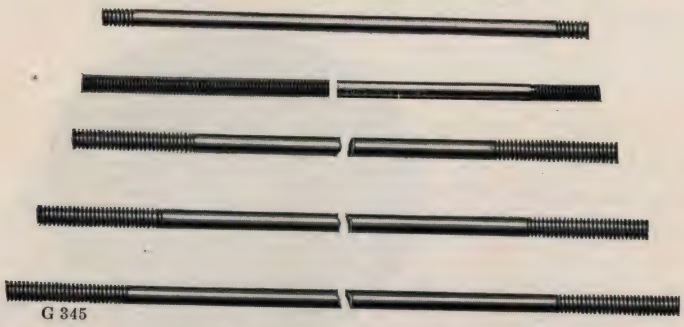
Code		Each
Oat	4 inches in diameter by 5 inches long	$1.16

Standard Package, 1 Dozen



If the float is damaged or even cut half through, its great buoyancy, on account of the air cells, will shut the ball cock off tight.

"Good" Float Rods



G 345

All ¼ inch Rod. 20 Threads per inch

Bronze				Brass

Code **Flick** ¼ inch—20 Male Thread x ⅜ inch—24 Female Per Doz. $2.80

Will adapt Standard Float to "Wolf" Combination

Wolf Float Rod Connecting Bushing

G 348

Code **Mound** ⅜ inch—24 Male Thread x ¼ inch—20 Female Per Doz. $2.44

Will adapt Standard ¼ inch x 20 Float Rods to fit "Wolf" installations

"Good" Tap Plugs

(Patented)

Three Cutting Grooves Like a Tap—Milled Out of Solid Rod

G 349

The only die cutting Tap Plugs made. "Good" Tap Plugs are the only ones having three actual cutting grooves the same as a die, this feature being patented.

The only Tap Plugs made which can be driven in without first drilling a hole.

Code	Diam. under Head	Per Dozen	Code	Diam. under Head	Per Dozen

"Good" Knife-blade Pipe Cutter Wheels

New — Thin

The most remarkable Wheel ever made

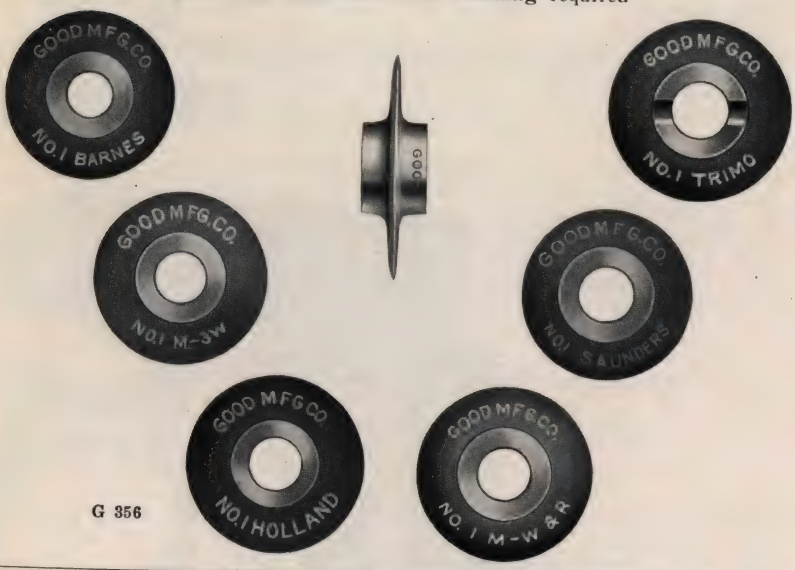
The "Good" Knife-blade Cutter Wheels will cut pipe in one-third the time of the best other wheels made, and with less labor, as they are thin—a regular "Knife-blade" and *No Reaming* is required. They will stand up to the most severe work under proper usage. The steel they are made of is the *only steel* which will stand the service required in this thin blade—the process is known only to the inventor, and the Good Manufacturing Co., Inc., have contracted for the exclusive right to the use of the steel for this purpose.

"Good" Knife-Blade Wheels must not be abused by prying off partly cut pipe, and to obtain the best results, cutter should be fitted with new pins every time new wheels are put in.

"Good" Knife-blade Cutter Wheels

Cut the pipe clean in one-third the time of regular wheels

Leave No Burr—hence No Reaming required



G 356

"Good" Pipe-joint Cement

For Water, Steam, Gas or Oil

G 364

The "Good" Cement

is the one Cement which gives entire and better satisfaction under any and all conditions than any other Cement or white or red lead.

The largest contracts can be completed in the minimum time with the absolute assurance of not a single leak, thus overcoming that uncertain "time loss" hunting for leaks and holding up contract payments.

"Sets" at once, allowing immediate testing.

While it always "sets tight," yet pipes can be readily disconnected when required.

The "Good" Pipe Joint Cement is the very best that has ever been made in the twenty-eight years it has been in use by the Trade.

Our wrenches are the most satisfactory manufactured.

Pipe Benders

Specially Shaped Spiral Crucible Spring Steel—Every One Guaranteed

G 400

Code			Each	Code			Each
Burr	1	inch	$1.32	**Burin**	1½	inch	$1.80
Burg	1¼	inch	1.44	**Burke**	2	inch	2.40

Pipe Bender Hooks

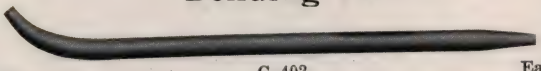
Cast Brass

A good clean casting; will not allow the bender to slip out

Code		Each
Lande	Pipe bender hooks	$0.96

G 401

Bending Pins



G 402

Code		Each
Fly		$0.70

Shave Hooks

G 403

Code		Per Dozen
Gaunt		$9.60

Tap Borers

G 404

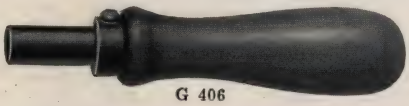
Code		Per Dozen
Gear		$8.40

Boxwood Dressers

G 405

Code		Each
Cactus	Every one guaranteed	$2.60

"Good" Soldering-iron Handles

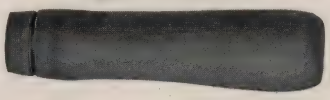


G 406

Code		Each
Cabal		$0.86

Made of gas pipe and best hard wood. Will not heat in use nor break. The irons are held fast by a set screw.

Regular Pattern



G 407

Code		Each
Cabin		$0.30

G 408

Turn Pins

Code		Per Dozen
Cacao	No. 1	$9.60
Cache	No. 2	9.60
Cackle	No. 3	9.60

Every one guaranteed

Drift Plugs

Made of Brazilian Lignumvitae

Code			Per Dozen
Cable	1	inch	$4.80
Cabob	1¼	inch	5.28
Cabos	1½	inch	6.00
Caburn	2	inch	6.24

G 409

Sand Plugs

G 410

Code			Per Dozen
Geck	1¼	inch	$14.32
Genet	2	inch	14.32

Candle Wicking

Code		
Cadet	Per dozen balls . .	$2.12
Cadge	Per bag, containing about 40 balls . .	7.04

This is an extra good quality

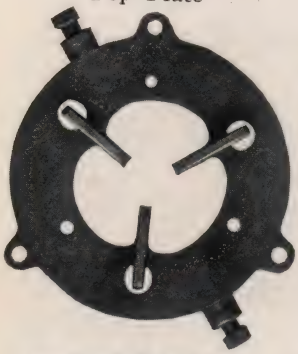
Tee

Code **Larch** $4.48 doz.

Top Plate



Code **Lard** $10.56 doz.

Upright

G 414

Code **Larder** $3.96 doz.
Standard Package, 1 Dozen

Coil Cup

Code **Larding** $14.24 doz.

"Good" Furnace Repairs

Nos. 1 and 2 Shields. Extra Fine

G 415

Code		Per Dozen
Large	No. 1 Shield, small	$33.26
Larger	No. 2 Shield, large, seamless	24.28

Metal Solder Pots

Malleable Iron

G 416

Code		Each
Gasp	5 inch, 4½ inch O.D. at top	$1.20
Gate	6 inch, 5⅝ inch O.D. at top	1.68

Leather Furnace Cups

G 417

Code		Per Dozen
Hed	For Clayton and Lambert pumps	$2.04

Fiber Oil Can Washers

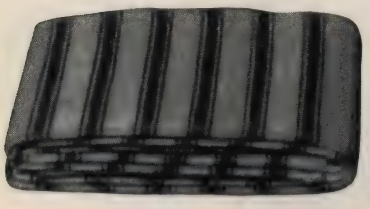
G 418

For Faucet on Gasolene and Oil Cans

Code		Per 100
Ether	½ inch diameter	$1.76

Wiping Cloths

Finest Quality Herringbone Ticking — Sixteen Thicknesses



G 419

Code		Per Dozen
Cage	1¾ x 2½ inch	$13.20
Cahoot	1¾ x 3 inch	13.20
Caic	2½ x 2½ inch	13.20
Caird	2½ x 3 inch	13.20
Cairn	3 x 3 inch	13.20
Cajole	3 x 3½ inch	13.20
Cake	3½ x 3½ inch	13.20
Calf	3½ x 4 inch	13.20
Calif	4 x 4 inch	13.20

These are thoroughly saturated in a special compound, which makes them ready for use at all times and makes greasing unnecessary. Are very durable and the folds are tied by hand and not stitched. Are wrapped in oil paper and tin foil so that they will not dry out.

Finest Moleskin

Code		Per Dozen
Lash	Sizes up to 2½x2½, inclusive	$16.56
	Sizes from 2½x3 up to 4x4, inclusive	16.56
